

physical connection TEST:-

1) Type of Mediums?

A) Two Type of medium is available

1. Wired

2. Wireless

1. Wired:- it may classified into
a. Electrical signal $\rightarrow$ Copper cable
b. Light signal $\rightarrow$ Fiber optical fiber

2. Wireless:- Radio frequency.

2) Write down switch 8-pins?

Switch

3

6

1

2

1 +R

2 -R

3 +T

4 +V

5 -V

6 -T

7

8

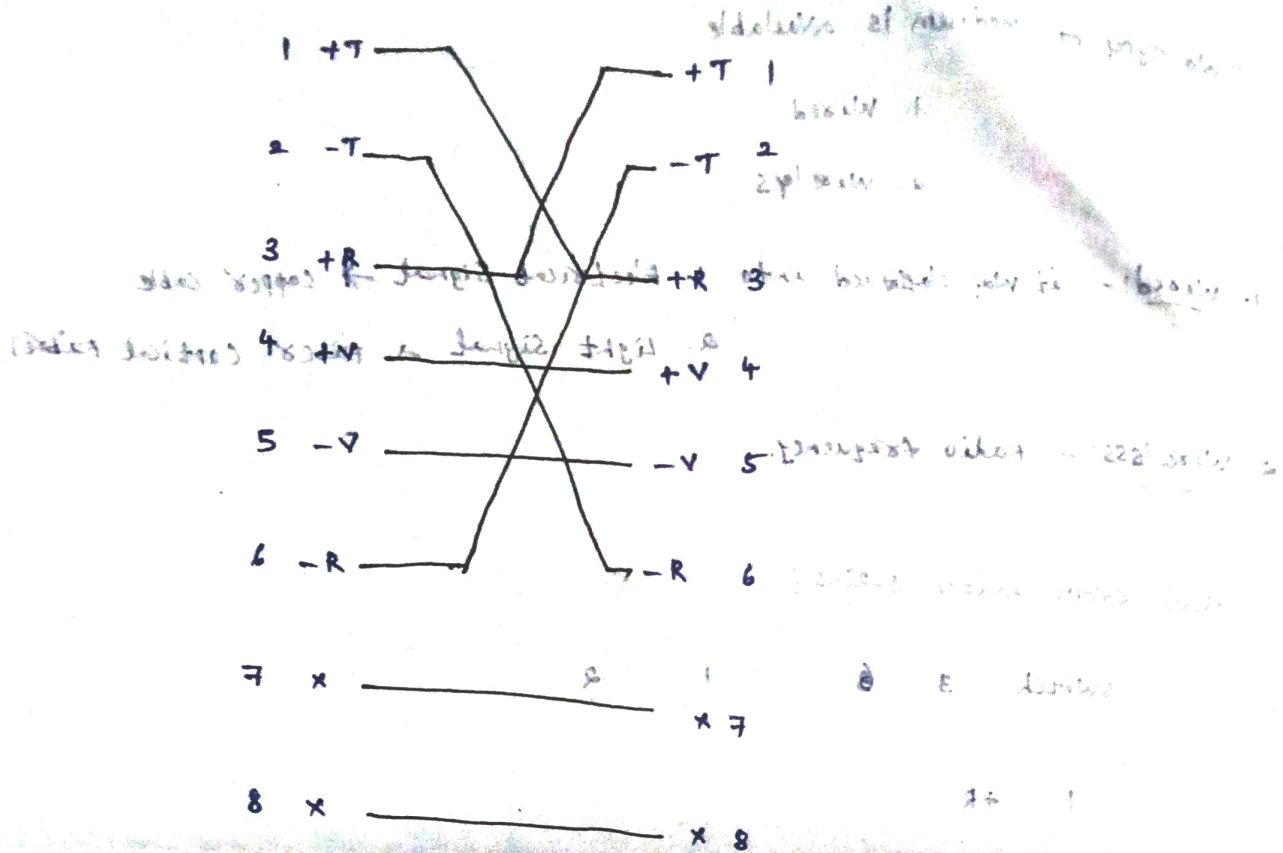

3. Connection of UTP cable b/w two device

1 2 3 6

R

PC

1 2 3 6

4. Explain AUTO MDIX?

A) Automatic medium dependent interface cross over.

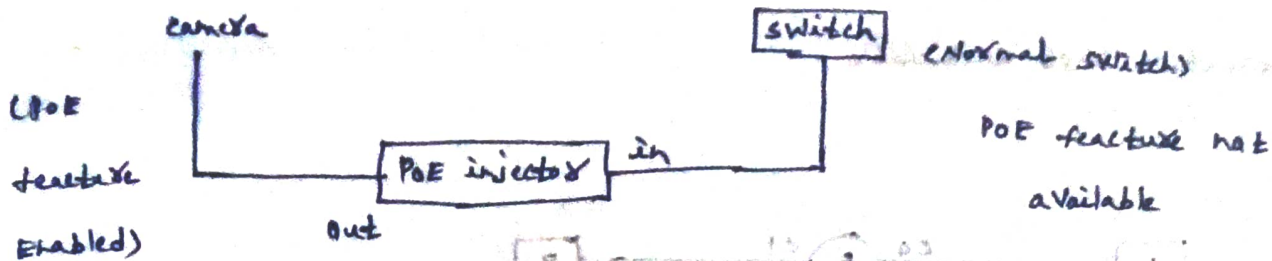

above feature is now available in modern device like (Switch, Routers).

Based on this feature the connected device in either same or different function, automatically the TX & RX signal may be adjusted. (Not required to connect based on colour code).

5) Explain PoE Injector?

A) PoE → Power over Ethernet

Ex:-

→ PoE injector always placed in b/w the switch & end device

→ The PoE injector receives the data from switch via input port

→ The PoE injector converts the AC supply into DC supply.

→ Merge the DC supply along with data & send through out port of PoE injector to camera.

→ Here the camera will support the PoE function so it will be work on based on the received DC supply.

7. Explain Type of NIC & Function?

A) NIC:- Network Interface Card

It is used to convert the Binary signal to Electrical signal & Electrical signal to Binary signal.

It is two type:-

1. Wired
2. Wireless

UTP

radio frequency

→ PoE injector always placed in b/w the switch & end device

→ The PoE injector receives the data from switch via input port
